3.1 Heatmap Analysis: /course

No Snapshot Captured Yet

No visitors have stayed on this page (desktop) long enough for a snapshot to be captured. Visitors need to stay for at least 5 seconds.

💡 How snapshots work:

- Snapshots are captured after 5 seconds of page load
- This ensures the page has fully rendered
- Quick visitors who leave immediately won't trigger captures
- Once captured, the snapshot is cached for this device type

Visualizing user interactions on /course. Areas of high intensity indicate strong user engagement.

3.2 Heatmap Analysis: /about

The image shows a heatmap overlay on a website's 'About' page. The heatmap highlights areas of high user engagement with a red-to-green color gradient. A prominent red-hot spot is located in the upper right quadrant of the main content area, where the title 'What We Do?' is displayed. A vertical blue scroll bar is visible on the right side of the page.
